WHO WE ARE

a vision of excellence

Paaras Marine Solutions Pte Ltd brings together a team of committed and passionate individuals with diverse skill sets and over 175 years of collective experience to provide world-class engineering and advisory services to the port, shipping and maritime industries. Skill sets include civil engineering, naval architecture, structural engineering, geotechnical engineering, quantity surveying, cost estimation, construction contracts, construction technical support, site supervision and project management.

All our team members have worked together for years, successfully delivering marine infrastructure projects around the world. This has helped develop and grow the team into a mature, high-performing unit, with client satisfaction as its primary focus.

Our team's experience covers a wide range of marine infrastructure, from marinas and yacht clubs to ferry and cruise terminals to power plants to major ports and terminals handling container, dry bulk, petroleum, petrochemical, LNG and LPG cargoes. This breadth of experience, coupled with an eclectic mix of skill sets, gives us a unique understanding of our clients' business operations and needs and how to unlock the development potential of a site in order to maximise value for our clients even in the most challenging of environments.

Our range of services span the entire lifecycle of projects, from inception and feasibility phases to delivering detailed engineering packages to construction support. Our services can also be tailored to fit into any stage of a project or extend beyond the project lifecycle into the operations and maintenance phase.

Our goal is to be a partner to our clients, to earn their trust and build lifetime relationships. We have no geographical boundaries to where we work. We will go where our clients will take us to!

INSPIRE.
INNOVATE.
TRANSFORM.

OUR VISION

To be a leading marine consultancy delivering innovative and sustainable solutions, creating a positive legacy for the clients we serve, the people we work with, the communities we touch and the environment we share.

OUR SERVICES

what we provide

FLOATING & FIXED MARINE STRUCTURES

TECHNICAL SUPPORT DURING OPERATIONS AND MAINTENANCE

THE MARKETS

we operate in

OFFSHORE RENEWABLE ENERGY

- + Solar Power
- + Wind Power
- + Tidal Power

COASTAL INFRASTRUCTURE

- + Container Terminals

WHY CHOOSE US

to collaborate with you

OUR TEAM

The team has worked together for years and has a proven track record of successfully delivering major marine infrastructure projects around the world.

OUR APPROACH

We continuously strive to deliver innovative, cost-effective and time-efficient services and solutions that are customised to the specific needs of our clients.

OUR NETWORK

We maintain a close network of partners from a wide range of disciplines and backgrounds, which allows us to lead and deliver complex, multidisciplinary marine infrastructure projects across sectors.

OUR RECIPROCAL RELATIONSHIP

We see ourselves as partners to our clients, and proactively leverage our extensive network and deep knowledge of the port, shipping and maritime industries to connect clients with new opportunities that will add significant value to their businesses.

*a team with over 175 years
of collective experience in*

Civil Engineering
